HYCON POWER PACKS

The HYCON hydraulic power packs can be used literally anywhere; fitted with wheels and hand bars, they are easy to handle on construction sites - even in tough terrains.

The HYCON power packs are simple to operate, and connection of the tool is easily done. All basic instructions are shown on the front panel, which makes the power packs perfect for any users and very suitable also for the rental business.

HYCON power packs are designed for professional users who expect maximum operating time, low service cost and durability.

The concept of HYCON power packs is to offer high performance, compact design, low weight packs and a minimum of wearing parts.

ADDITIONAL FEATURES:

- ▶ Available in gasoline, diesel and electric models
- ▶ All moving parts are mounted directly on the engine shaft
- ▶ Fan supply additional air for engine cooling giving better performance and lifetime in demanding and hot conditions.
- ▶ Closed hydraulic system - all parts run in oil.
- ▶ All Hycon tools and HTMA compliant tools can be operated from the power packs.
- ▶ Easy cleaning of oil cooler and all parts from the outside with high-pressure cleaners.

**HPP06
GASOLINE**

HPP06 is the ultimate compact and lightweight power pack.

Being the smallest pack in our range, it will operate any 20 lpm tools with good performance in jobs where the small, compact size and weight is of highest importance.

**HPP09
GASOLINE**

The HPP09 operates any 20 lpm tools such as breakers, saws, pumps and core drills at maximum performance. Featuring a hydraulic throttle control system (Power On Demand) that automatically speeds up the engine when the connected tool is activated. This power pack is very popular for rental business, contractors, municipalities and supply companies.

**HPP13 FLEX
GASOLINE**

HYCON HPP13 FLEX is the bestseller of our FLEX power packs. It is used mainly for contractors, rental, municipalities, supply companies etc.

From the front panel it is easy to adjust the flow between 20 and 30 lpm, therefore this power pack is ideal for running all 20 and 30 lpm tools

**HPP18V FLEX
GASOLINE**

HYCON HPP18V FLEX is extremely popular among users of high performance diamond tools for drilling and cutting concrete.

For users in need of 20 to 40 lpm flows for running our larger Cut-off saws, the ring saw and large breakers works also in warm climate conditions.

**HPP23V FLEX
GASOLINE**

This type offers the same features as our HPP18V Flex but is with a 23 Hp B&S Vanguard engine able to run any tools from 20-46 lpm.

Perfect for large saws, wall saws and concrete chain saws with need for 46 lpm.

**HPP18V
MULTIFLEX
GASOLINE**

HPP18V Multiflex is built on the same platform as HPP18V Flex but with a tan-dem gear pump for two independent outlets. A 3rd outlet where the two pumps are connected for a flow up to 40 lpm makes it perfect for operation of two 20 lpm tools independently or one 30-40 lpm tool with full performance.

**HPP13D FLEX
DIESEL**

The HPP13D is perfect for running any 20 or 30 lpm tools in tunnels or other areas where gasoline fuel or fumes are not allowed. The strong and well designed HYCON steel frame ensures great protection, but also easy service access to all vital parts. As known from all HYCON power packs

**HPP09E
ELECTRIC**

HYCON HPP09E is our smallest electric power pack. It has a heavy-duty industrial motor, which enables use everywhere 3x400 V - 16A is available. Compact in size and electric driven.

Therefore, perfect for indoor operation of any 20 lpm tools, with maximum performance.

**HPP18E
ELECTRIC**

HYCON HPP18E is equipped with a 11 kW motor, and comes in a 30 lpm and a 40 lpm version. The perfect power pack for professional and specialized companies within concrete drilling, cutting and others.

The power packs are equipped with a Y/D start function ensuring low start current.

**HPP18E FLEX
ELECTRIC**

HYCON HPP18E FLEX is equipped with a 13,2 kW (18 HP) motor, and the flow can be set to 20 - 30 - 40 - 46 lpm which makes it the perfect power pack for professional and specialized companies within concrete cutting and coring.

OIL FLOW DIVIDER

For mounting on excavators etc. for protection of tools against overload.

Max. oil flow in: 80 l.p.m.
Oil flow out: 20, 30 or 40 l.p.m./max. 160 bar

Item no. 3030060
